

Full Speed into the Cloud!

We will sketch out a clear, customized migration path for you

No path is without its challenges. But people who know the obstacles can circumvent them intelligently – and this is also true for the migration into the cloud. This is exactly what we prepare in the “Mobilize” phase with the aim of developing a coordinated migration strategy. Our experts analyze and evaluate your current IT environment and identify possible obstacles. We work with you to create a customized roadmap to the cloud that eliminates obstacles and perfectly prepares your landing zone in the cloud.

An IT environment that grows with you and supports your business

We want to put things in motion and move confidently towards your cloud migration goal. Therefore, we refer to this as the “Mobilize” phase. We then use the results and the migration strategy to ensure that your migration is successful and meets all your needs. In the process, our experts adjust your new IT environment so that it continuously evolves with your company and optimally supports your business. As an AWS partner, we will apply for comprehensive AWS migration funding to do this, so you can get on your journey very quickly and affordably.

Your benefits

The migration to the cloud does not have to be long and complicated: We help you to quickly get on the right path. Our comprehensive approach allows you to reduce your infrastructure costs and drives the sustainable transformation of your company forward. With our experience from countless migrations, we support you in optimizing your applications and processes and in keeping the costs for the cloud infrastructure low.

Work with an AWS partner from the very beginning

As an experienced AWS expert, Skaylink offers you many advantages as an IT partner:

- First AWS Security Competency Partner in the German-speaking region (Germany, Austria, Switzerland)
- Comprehensive support from the “Assess” phase, enablement, and technical migration to various services
- More than 100 certified experts
- More than 20 years of experience in enterprise IT for large and regulated industries
- More than 20 years of experience in migration, transformation, and digitalization projects

Do you have questions for an AWS expert?
