

AWS Partner Accelerator

Together on an accelerated cloud journey

Customers often tell us that they want to get started quickly with cloud solutions and their own cloud journey. However, budget constraints, uncertainties about an appropriate starting point, and unresolved issues can complicate implementation.

As an AWS partner, we offer an easy and fast way to accelerate your cloud journey. With our AWS Partner Accelerator, we help you identify your individual problem areas and thus remove the first and biggest obstacles.

Apart from identifying obstacles, we also actively support you in the technical implementation, the creation of concepts and all other tasks that are important to you.

Partnership provides acceleration

As part of the AWS Partner Accelerator, we will support you in successfully launching your cloud journey within 10 days. For example, our diverse expertise can help you set up the AWS Control Tower and implement IT security and cloud migrations.

Our experts will not only explain what needs to be done, but will also help you understand the reasons behind the decisions. Moreover, you will learn in a hands-on way.

Your benefits

With the AWS Partner Accelerator, you benefit from comprehensive AWS funding. You will be able to test your individual use case hands-on, without incurring high costs in the process.

Furthermore, we offer you best practices and clear recommendations for action based on our broad and long-standing expertise in the area of public cloud. We accompany you securely and efficiently on your cloud journey and support you in the successful implementation of your goals.

Work with an AWS partner from the very beginning

- Experience from two decades of cloud-/IT consulting, ranging from early adoption to full-scale implementation for high-profile enterprise customers in a variety of industries
- We can not only work out theoretical approaches, we can also implement them in practice
- Skaylink is the first AWS Security Competency Partner in the German-speaking region (Germany, Austria, Switzerland)
- Skaylink is the first Preferred Partner for AWS ProServe Security & Infrastructure projects

Do you have questions for an AWS expert?
