Managed AWS Hosting for Shopware

aws

PARTNER
Premier Tier
Services

Flexible modular system

Managed AWS Hosting for Shopware based on AWS cloud technology. We implement tested basic architectures that can be extended by additional standardized modules at any time. Our transparent pricing model with AWS cost control provides planning certainty.

Fort Knox security

Rely on our proven security infrastructure and add data encryption, DDoS protection, WAF, MFA, bot defense, and more. We provide geo-redundancy and failover protection for your infrastructure as standard.

Global infrastructure

Your Shopware EE can be operated anywhere in the world, close to your customers in the US, Europe, South America, Australia, Asia, and of course Germany. You decide where your data is!

Peak load optimization

We actively support your developers in optimizing peak loads and help improve your performance. We provide tools for this purpose, perform load tests, and harden your cloud solution on request.

Comprehensive scalability

Forget about bottlenecks. We can scale any part of your infrastructure how you like it at any point in time. Furthermore, use automatically scaling services like web servers, databases, load balancers, and Docker clusters.

VMs or containers

You can choose between virtual machines, containers, or a combination of both. No matter what you decide, we will connect your CI pipe to your AWS Cloud for Shopware EE.

24/7 Managed Services

We monitor your cloud environment with a guaranteed SLA and are available to you around the clock. Moreover, you will have insight into all relevant metrics of your AWS Cloud for Shopware EE via the Skaylink dashboard.
