

# AWS Immersion Day

Hands-on AWS training  
delivered by Skaylink

An AWS Immersion Day delivered by Skaylink is a hands-on training session that gives participants the opportunity to work with AWS technologies in a live environment. Guided by Skaylink's certified solution architects, attendees will receive expert instruction tailored to their needs. As an accredited partner, Skaylink ensures that instructors are highly qualified and continually update their knowledge to provide a high-quality modern learning experience.

Sessions of this type provide a deep and comprehensive understanding of AWS, either by focusing on specific areas within the AWS ecosystem – such as **Security, Migration, or Data Analytics** – or by providing a broader, introductory overview of AWS cloud services.

Throughout the day, participants will engage in practical, hands-on lab exercises and apply best practices for building, deploying, and managing cloud-based solutions on AWS. The exercises are designed to mimic real-world scenarios, ensuring that the knowledge gained can be directly applied to the participant's professional environment.

The sessions are designed for developers, IT professionals, and teams interested in expanding their AWS knowledge. They are particularly valuable for those new to AWS or familiar with open-source tools who wish to gain experience with AWS managed services such as Amazon EKS or AWS OpenSearch.

## Your benefits

Skaylink provides in-depth, hands-on training for your team to gain a comprehensive understanding of AWS services and solutions. Participants actively engage with AWS technologies in a live environment set up by Skaylink.

Sessions are led by certified and accredited AWS Solutions Architects who deliver in-depth technical presentations on relevant topics. The training format and content are highly flexible and can be customized to meet your specific needs, whether you wish to focus on particular AWS services or solutions, or prefer a general overview of the AWS platform.

AWS Immersion Days can be hosted online, at a client's site, or at a Skaylink location, with a recommended minimum of five participants. The training typically lasts one day and includes pre-configured lab environments provided by Skaylink.

## Why Skaylink?

- Assisted over 350 companies in successfully migrating to the cloud
- Provides support for the entire project life-cycle: planning, implementation, operation, ongoing support
- 10+ years of AWS consulting experience
