skaylink

Migrate confidently, modernize effectively

As an AWS partner, we provide the expertise, tools, and a proven approach to make your cloud journey faster, safer, and fully aligned with your business goals.

We help you unlock the full value of AWS by guiding you through every phase of the migration journey – **Assess, Mobilize, Migrate & Modernize** – leveraging the proven framework of the AWS Migration Acceleration Program (MAP).

Whether planning your first cloud move or transforming complex legacy environments, we customize every step to fit your business needs.

Our services include:

- Cloud readiness and total cost of ownership assessments, including business case development
- Immersion Days as accelerators
- Setting up secure landing zones and operational readiness
- Rehosting virtual machines, replatforming (e.g., databases) or refactoring applications
- Providing support for modern solutions such as containers, open source, cloud-native, and AI

Why Skaylink?

Certified AWS expertise: We bring deep technical expertise with regard to AWS and other technologies, backed by a proven track record of successful migration projects.

MAP-aligned approach: Our methods are fully aligned with AWS MAP to accelerate and de-risk migrations while unlocking AWS fundings.

End-to-end support: We guide you from initial assessments to ongoing managed services.

Business-focused: We align technical decisions with your strategic goals and success metrics.

Who is the MAP intended for?

In short: actually for everyone, since we cover a wide range of scenarios, including virtual desktops, web apps, enterprise solutions like SAP, databases, analytics platforms, and disaster recovery. But especially for:

- Organizations looking to migrate applications from any platform to AWS
- Organizations aiming to modernize their applications to boost agility and performance
- IT leaders seeking to optimize costs, scalability or resilience by leveraging the cloud
- Teams eager to move fast – with confidence and expert guidance

What can you expect?

- A proven migration path aligned with the MAP framework
- Cost-effective solutions with AWS funding
- Smart, tailored modernization using AWS tools and additional software (e.g., for code analysis or containerization)
- Scalable, secure, highly automated architectures ready for the future
- Ongoing knowledge transfer to your teams
- A trusted partner dedicated to your long-term success
